Design and Development Department

Recruitment test

Development

Hello!

Welcome to the Design & Development Department recruitment process. This exercise is not intended to be used outside of this test.

Instructions:

This test is designed to demonstrate skills in javascript. It is a free choice, we will value your criteria when developing it.

Requirement:
You must create an interface where you have 2 sections.

Section 1:

- You must have a list, where we can add items, edit them and delete them.
- It must have a dynamic search engine for the items.
- When the item is selected, it must go to the second section.

Section 2:
- Must receive items from list 2 when they are checked.
- Must return items to list 1 when they are not checked.
- Must have dynamic search engine
- Must be able to be deleted

Here is an example.

How to deliver?

You must deploy the projects in https://netlify.app/ and you must send the git with the deployment, to verify the code.
